Dear Buz

ACIAR Support for Food Plant Solutions

As discussed recently, the Australian Centre for International Agricultural Research (ACIAR) is very supportive of the Rotary District 9380 Food Plant Solutions Program. This program is consistent with ACIAR and the Australian Government's objectives of poverty reduction and increased food security in developing countries. We see collaborative opportunities for ACIAR and this program with respect to our indigenous foods program, particularly in PNG, The Pacific and Southeast Asia.

As we develop new projects in these areas we will work closely with your organisation with a view to exploring and developing opportunities for us to further support the Food Plant Solutions Program both financially and through extension of the outputs of your project. We look forward to continuing to work closely with you in the future.

Yours sincerely

Les Baxter
Research Program Manager, Horticulture
